Field Chairman
David Stewart

From The President
James Elkins

Welcome to the first edition of the Collective Newsletter!

We recently had a workday and I would like to thank everyone that helped out. I would like to give a special shout to Chris for bringing that loader and digging up the stumps in the driveway.

Don't forget we are going to have an Easter Egg Hunt on April 23rd and everyone is welcome including friends and family. The hunt will begin around 11:30, we would like for everyone to bring some eggs to make sure there is enough for all the children. There will also be a cookout with more details coming soon.

The club now has a new chainsaw that was donated by David Stewart.....Thanks!

I would also like to mention IRCHA. If you are interested in going let me know. A few of us are going to convoy up there while others are planning on flying. If you don't get your room and golf

cart reserved soon you will be sleeping in your car.

Don't forget about the Heli Setup Class this Saturday. It starts promptly at 8:30am. If nothing else just stop in at Oklahoma Hobbies and RC and tell Michael what a great job he's doing.

Till next month, see you at the field,
James

Safety is our number one concern. We have fire extinguishers in the pits and at the pilots stations. Please make note of their locations.

Collective R/C meets the first Monday of the month at the CTS Offices
3500 S. Lakeside Drive Oklahoma City, OK at 7:00 PM.
All members are urged to attend.

Ryan demonstrating
how to get really
LOW!!!

Notes from April's meeting

At the April 4th club meeting there were 12 members and 1 guest in attendance.

We currently have 26 active members .

The problem with our new Membership Cards has been fixed and they should be available soon.

The work day was a success. The stumps were removed from the driveway, the pits, and the field. The trees in the pits were trimmed. The driveway was then graded.

This months door prize winner was Keith Smith.

The car track is getting a makeover. Thanks to Craig and Nathan for their hard work.

“Heli Setup class” By Michael Wyatt

It's not just for beginners!! In the past we've gone over everything from charging batteries to setting up Flybarless systems. So come on come all! I also need some help from everyone with ideas for future classes. Even if it is on specific things.

Futaba Rules!

The new Blade MCPX
being test flown by
Michael.
